Temporarily closed

LC-06-23 Shadel

Status of File- approved

Stream Name- Beaver Creek (Lincoln)

Project Type and Purpose-Bank stabilization and restoration

Time Frame- As soon as a contractor can be hired

Maintenance- no

Dimensions-90' x 14'

Materials- excavator 120, rip rap (application said recycled concrete)

Team Report Comments- use rock rip rap instead on concrete 18"-24", import nearby fill to build 2:1 slope, key in rock, revegetate about rip rap, vertical extent of rip rap should not exceed bank full elevation, use remaining willow line as a reference to guide construction of the new bank line through the meander, try to salvage trees that must be removed in incorporate rootwads into the rip rap.
